SUMMARY

Final-year Computer Science student and passionate Software Engineer with expertise in React.js, Next.js, and system architecture. Worked in Backend, Database and production deployment on Vercel. Actively seeking a Software Development Engineer role to build robust systems and elevate engineering standards.

EDUCATION

Bachelor of Technology in Computer Engineering

Expected May 2026

Punyashlok Ahilyabai Holkar Solapur University, Solapur . CGPA: 9.64/10

TECHNICAL SKILLS

- **Languages & Frontend:** Java, HTML5, CSS3, JavaScript (ES6+)
- **Libraries/ Frameworks:** React.js, Next.js, Tailwind CSS, Material UI, Bootstrap, Shadcn UI
- **Backend / CMS:** Prisma ORM, Drizzle ORM, Neon DB (PostgreSQL), Sanity.io
- **Authentication / AI:** Clerk Auth, Arcjet Security, Gemini API
- **Tools / Deployment:** n8n, Git, GitHub, Vercel, Postman, VS Code

KEY PROJECTS

Pandharpur Darshan - Comprehensive Pilgrim Platform — *Next.js, Sanity.io, Prisma, Agentic AI, Vercel & GoDaddy Deployment*

- Architected a full-stack platform using Next.js (SSR/SEO) and Sanity CMS for dynamic content (temples, festivals, lodging).
- Developed an AI-powered trip planner generating personalized itineraries and routes for pilgrims with integrated WhatsApp inquiry support.

Machine Doctor AI — *Next.js, ClerkAuth, Prisma, Neon DB, Agentic AI, Razorpay, Vercel Deployment*

- Built a diagnostic platform using Next.js to analyze industrial machine health logs using AI.
- Implemented secure file validation and integrated Razorpay for credit-based transactions.

KrishiConnect - B2B Farmer-Agent Marketplace — *Next.js, Prisma, Clerk Auth, Agentic AI, Vercel Deployment*

- Developed a role-based B2B platform with dashboards for farmers and agents using Clerk authentication.
- Integrated AI chatbot and WhatsApp-based communication for seamless interaction.

AI Hiring Automation System — *n8n, HTTP, AI API, Google Sheets, Gmail, Render Deployment*

- Built an automated hiring workflow using n8n to process candidate data from Google Forms and evaluate profiles using AI.
- Automated email communication and maintained real-time candidate tracking in Google Sheets, reducing manual screening effort.

CivicConnect — *Next.js 16, Clerk Auth, Prisma, Neon DB, Tailwind CSS, Vercel Deployment*

- Engineered a digital grievance redressal system using Next.js 16, replacing manual paperwork with a streamlined, location-based reporting workflow.
- Implemented Role-Based Access Control (RBAC) using Clerk and Prisma to secure administrative dashboards for municipal officials.
- Integrated geolocation tracking and real-time status updates to enhance transparency and accountability in civic governance.

AI Career Helper — *Next.js 15, Generative AI, Prisma, Neon DB, Razorpay, Vercel Deployment*

- Developed a full-stack career acceleration platform using **Next.js 15**, leveraging **Generative AI** to produce personalized cover letters and structured learning roadmaps.
- Engineered a robust **JSON validation pipeline** to enforce strict schema compliance on AI outputs.
- Implemented a secure **credit-based monetization system** using **Razorpay** and **PostgreSQL**, managing atomic transactions and user balances via server-side actions.

- Built an adaptive **Mock Interview Simulator** that creates context-aware technical questions and feedback loops based on the user's specific tech stack and experience level.

Bajbalkar Ropvatika and Consultancies — *Next.js, Sanity CMS, Clerk, Razorpay, AI Chatbot, Vercel Deployment*

- Developed a scalable, multi-vendor e-commerce platform using **Next.js** and **Sanity CMS**, enabling dynamic management of nursery inventories and multimedia-rich farmer blogs with video integration.
- Engineered a robust **multilingual architecture** to localize content across the application, significantly expanding accessibility for regional farmers and buyers.
- Integrated **Razorpay** to handle secure payment processing for product orders, utilizing **Clerk** for seamless, secure user authentication and role-based access control.
- Deployed an intelligent **customer support chatbot** to automate query resolution and assist users with product selection, enhancing engagement and reducing manual support workload.

PROFESSIONAL EXPERIENCE

Software Developer Intern <i>WebVarad Solutions</i>	<i>Dec 1, 2025 – Present</i>
Frontend Engineer Intern (Virtual) <i>IBM SkillsBuild by Edunet Foundation through AICTE, Remote</i>	<i>Aug 21, 2025 – Sep 30, 2025</i>
Fullstack Development Trainee <i>Fourise Software Solutions Pvt. Ltd., Pune, Maharashtra</i>	<i>June 12, 2024 – June 26, 2024</i>

ACHIEVEMENTS

- **Runner-up** - Smart India Hackathon (National Level, 2024) among 500+ teams
- **1st Rank (College Level)** - Avishkar Research Convention (PG Category), recognized for research excellence and innovation
- **Selected for Phase 2** - Yukti Innovation Challenge, validated for technical viability and commercial potential
- **Best Trainee Award** - Fourise Software Solutions Pvt. Ltd. (2024)
- **Top 8 Finalist** - SGU University Hackathon (2023) for AI-based travel planner UI design
